

SNP-01

Class 08 - Science

1. Which one of the following is most destructive? [1]
 - a) Typhoon of speed 150km/h
 - b) Tornado
 - c) Storm of speed 200 km/h
 - d) Earthquake of more than 7 magnitude
2. Waves produced on the surface of earth by tremors are called [1]
 - a) Seismic waves
 - b) Transverse wave
 - c) Mechanical waves
 - d) Longitudinal waves
3. When charge move, they constitute an [1]
 - a) electric current
 - b) magnetic effect
 - c) all of these
 - d) heating effect
4. The earth's plate responsible for causing earthquakes is [1]
 - a) the crust of the earth
 - b) the mantle of the earth
 - c) the outer core of the earth
 - d) the inner core of the earth
5. Richter scale is related to [1]
 - a) lightning
 - b) thermometer
 - c) earthquake
 - d) thunderstorm
6. During thunderstorm which action may be done? [1]
 - a) All of these
 - b) Using a mobile phone
 - c) Switching ON and OFF of electrical switches
 - d) Using telephone having code
7. Earthquakes can cause _____ [1]
 - a) Floods, Lightening, Landslide
 - b) Tsunami, Lightening, Floods
 - c) Tsunami, Floods, Landslide
 - d) Tsunami, Lightening, Landslide
8. Natural disaster can not be predicted as [1]
 - a) They occurs suddenly
 - b) They last for short duration
 - c) They do not provide clue
 - d) They are rare
9. Lightening strike could destroy [1]
 - a) Microbes only
 - b) Plants only

- | | | | |
|-----|---|--------------------------------|------------|
| | c) Life and property | d) Animals only | |
| 10. | Two objects with like charges will | | [1] |
| | a) either attract or repel | b) repel each other | |
| | c) neither attract nor repel | d) attract each other | |
| 11. | Losing static electricity as charges move off an object is called | | [1] |
| | a) Electric discharge | b) Charging | |
| | c) Insulation | d) Electric conductivity | |
| 12. | The process of transferring a charge from a charged body to the earth is called | | [1] |
| | a) Earthing | b) Discharging | |
| | c) Electrolysis | d) Hydrolysis | |
| 13. | Which among the following is not a natural phenomenon? | | [1] |
| | a) Earthquake | b) Cooking | |
| | c) Cyclone | d) Lightening | |
| 14. | Tsunami means | | [1] |
| | a) eruption of volcano in sea | b) flood | |
| | c) earthquake under sea | d) earthquake | |
| 15. | Consider the list of terms given below: | | [1] |
| | i. Tsunami, | | |
| | ii. Landslide, | | |
| | iii. Floods, | | |
| | iv. Lightning Earthquakes can cause | | |
| | a) (ii) and (iv) | b) (ii), (iii) and (iv) | |
| | c) (iii) and (iv) | d) (i), (ii) and (iii) | |
| 16. | A device used to test whether an object is carrying charge or not is called | | [1] |
| | a) Charge meter | b) Electrometer | |
| | c) Electroscope | d) Voltmeter | |
| 17. | Lightning conductors are used to protect from | | [1] |
| | a) lightning flashes | b) earthquake | |
| | c) thunderstorms | d) cyclones | |
| 18. | Which natural disaster is very rare in India? | | [1] |
| | a) Earthquake | b) Thunderstorm | |
| | c) Tornado | d) Cyclone | |
| 19. | Increase in level of carbon dioxide in air causes | | [1] |
| | a) Uniform earth temperature | b) No change in temperature | |
| | c) Decrease in earth temperature | d) Rise in earth's temperature | |

20. A balloon, when taken near candle, burst because [1]
 - a) Balloon reduced in size
 - b) Air inside condense
 - c) Air inside expands
 - d) Balloon melts
 21. Which of the following is negatively charged? [1]
 - a) Atom
 - b) Neutron
 - c) Proton
 - d) Electron
 22. It is easier to row a boat in the direction of wind because [1]
 - a) Fresh air help the sail in easy breathing
 - b) Air exerts pressure in opposite direction
 - c) Cold wind is lighter
 - d) Air exerts pressure in direction of sailing
 23. Which of the following is not likely to cause Tsunami? [1]
 - a) A major nuclear explosion undersea
 - b) Earthquake
 - c) Lightning
 - d) Volcanic eruption
 24. The outermost layer of earth is called [1]
 - a) Mantle
 - b) Crust
 - c) Outer core
 - d) Inner core
 25. The lightning conductor was first established by a scientist named: [1]
 - a) Issac Newton
 - b) Thales
 - c) Robbert Hooke
 - d) Benjamin Franklin
 26. Earthquake activities are monitored by using [1]
 - a) Radio and television
 - b) Satellite
 - c) Wireless and radio
 - d) Can not be monitored
 27. If a storm is accompanied by lightning, we should not take shelter under a high tree because [1]
 - a) It may contain other animals
 - b) It has more rain falling
 - c) It has more chance of falling thunder
 - d) It may fall during storm
 28. In Japan cyclone is known as [1]
 - a) Typhoon
 - b) Storm
 - c) Thunderstorm
 - d) Hurricane
 29. Wind blows faster when [1]
 - a) There is no difference in pressure
 - b) Moisture in air is more
 - c) Pressure difference between two places is less
 - d) Pressure difference between two places is more
 30. Building can be protected from lightening by using [1]
 - a) Lightening rod on the levels of building
 - b) All of these
 - c) Lightening rod at the top of building
 - d) Wooden logs at the top of building
 31. Two charged objects are brought close to each other. Choose the most appropriate statement from the following [1]

options:

- | | | | |
|-----|--|--|-----|
| | a) they may attract or repel depending on the type of charges they carry | b) they may attract | |
| | c) there will be no effect | d) they may repel | |
| 32. | Seismograph is an instrument used to record | | [1] |
| | a) Temperature | b) Lightening | |
| | c) Vibration of earthquake | d) Strength of wind | |
| 33. | Like charges repel and unlike charge | | [1] |
| | a) Repel each other | b) Attract each other | |
| | c) Any thing may happen | d) Repel or attract | |
| 34. | Flash point term is related to | | [1] |
| | a) Study of lightening pattern | b) Study of cyclone | |
| | c) Study of climate | d) Study of earthquake | |
| 35. | In ancient times, people thought that earthquake and lightning is due to | | [1] |
| | a) Brushing of plates of earth | b) Wrath of god visiting them | |
| | c) Pollution of air | d) Charging of clouds | |
| 36. | When a glass rod is rubbed with a piece of silk cloth the rod | | [1] |
| | a) and the cloth both acquire positive charge | b) becomes negatively charged while the cloth has a positive charge. | |
| | c) and the cloth both acquire negative charge. | d) becomes positively charged while the cloth has a negative charge. | |
| 37. | The movement of the earth's plates causes | | [1] |
| | a) lightning | b) earthquakes | |
| | c) thunderstorms | d) cyclones | |
| 38. | Lightning is seen little earlier than thunder sound because | | [1] |
| | a) Light require medium for propagation | b) Light moves slower than sound | |
| | c) Light travels faster than sound | d) Sound require medium for propagation | |
| 39. | Dark funnel shaped cloud reaches to earth from sky are called | | [1] |
| | a) Lightening | b) Cloud burst | |
| | c) Tornado | d) Typhoon | |
| 40. | Electroscope is used to | | [1] |
| | a) Check presence of charge | b) Measure the temperature | |
| | c) Measure the conductivity | d) Presence of magnetism | |
| 41. | High speed winds are accompanied by | | [1] |
| | a) Low temperature | b) Reduced air pressure | |

- c) Increased air pressure d) High temperature

42. Sparkers can be seen on an electric pole. Which wires become [1]

a) Loose b) Tight

c) Wrinkle d) None of these

43. Which of the following is not caused by an earthquake? [1]

a) Flood b) Tsunami

c) Landslide d) Thunder

44. Which state in India is badly affected by cyclone recently? [1]

a) Jharkhand b) Karnataka

c) Orissa d) Bihar

45. The boundaries of earth's plates, where earthquake tends to occurs are called [1]

a) Fault zones b) Volatile zone

c) Poor zone d) Default zone

46. Lightning conductor [1]

a) does not affect the building b) affect the building

c) protects the building d) destroys the building

47. Electrons and protons attracted each other because [1]

a) They are negatively and positively charged and opposite charges attract each other b) Both are neutral

c) Both are positively charged d) Both are negatively charged

48. The waves produced on the earth's surface are called [1]

a) seismic waves b) radio waves

c) longitudinal waves d) microwaves

49. The like charges [1]

a) All of these b) No interaction takes place

c) In contrast to the attractive force between two objects with opposite charges, two objects that are of like charge will repel each other. That is, a positively charged object will exert a repulsive force upon a second positively charged object. This repulsive force will push the two objects apart. d) Attract each other

50. During thunderstorm it is safer to [1]

a) Use umbrella b) Stand in open field

c) Take shelter under tall tree d) Take shelter under short tree

51. Rapid volume of air due to lightning cause [1]

- a) Flood
c) All of these
- b) Cyclone
d) Thunder
52. Which of the following is not due to pressure change? [1]
a) Lightening
b) Earthquake
c) Cyclone
d) Thunderstorm
53. Rearranging charges in uncharged metal object without contact with charged object is called [1]
a) Conduction
b) Insulation
c) Electrical discharge
d) Induction
54. A wind vane is used to find the [1]
a) Wind speed
b) Air humidity
c) Wind direction
d) Air pressure
55. Windmill is used to [1]
a) Measure wind direction
b) Produce high speed wind
c) Generate electricity
d) Measure wind speed
56. Electric current is to be passed from one body to another. For this purpose, the two bodies must be joined by [1]
a) copper wire
b) cotton thread
c) plastic string
d) rubber band
57. An object becomes charged when the atoms in the object gain or lose [1]
a) Proton
b) Neutron
c) Positron
d) Electron
58. An electroscope is a device that is used to find if an object is [1]
a) hot
b) magnetic
c) charged
d) free of cracks
59. Two objects repel each other. What charges might have? [1]
a) Positive and Negative
b) Negative and Positive
c) Both may be having either negative or both positive charges.
d) Only two positive charge
60. Lightening occurs due to [1]
a) Rain
b) Electric discharge
c) Lord Varun anger
d) Wind
61. Which instrument is used to measure earthquake? [1]
a) Biometer
b) Polygraph
c) Seismograph
d) Thermometer
62. Instrument to measure waves of the earthquake is called [1]
a) Seismograph
b) Wave meter

- c) Galvanometer d) Richter scale
63. Earthing is the process of transferring charge from charged object to [1]
 a) Opposite charge b) Neutral
 c) Earth d) Water
64. Consider the list of terms given below [1]
 i. Tsunami
 ii. Floods
 iii. Landslide
 iv. Lightning
 Earthquakes can cause
 a) (ii), (iii) and (iv) b) (ii) and (iv)
 c) (i), (ii) and (iii) d) (iii) and (iv)
65. Farenhite thermometer shows 14°F. How much will be this temperature on Celsius scale? [1]
 a) -10 °C b) -20 °C
 c) 20 °C d) 10 °C
66. The point at which a movement occurred which triggered an earthquake is called [1]
 a) Strike b) Epicentre
 c) Focus d) Dip
67. What happen when glass rod is rubbed with silk and attain positive charge? [1]
 a) Proton moves out from glass rod b) Electron moves out from glass rod
 c) Electron moves into atmosphere d) Electron moves out from silk
68. Electrical charges produced by rubbing are called [1]
 a) Static charge b) Lightening
 c) Electrical charge d) Dynamic charge
69. Major earthquakes are less likely to occur in [1]
 a) inner core b) crust
 c) mantle d) outer core
70. What makes the balloon inflated when placed in hot water? [1]
 a) Increased temperature makes the balloon heavy b) Increase temperature increase the pressure
 c) Increase temperature make the balloon lighter d) Increased temperature makes the balloon softer
71. The area where earthquake are likely to occur are called [1]
 a) Endangered region b) Earth heating zone
 c) Seismic zone d) Most dangerous area
72. To protect tall building from the damage of lightning, what should be done? [1]

- | | |
|--|-----------------------------------|
| a) Have a roof top garden with tall tree | b) Installing antenna at roof-top |
| c) Installing a large dish antenna | d) Install lightning conductor |

73. Consider the list of terms given below: [1]

- i. Seismic Zone
- ii. Mantle
- iii. Fault Zone
- iv. Inner Core

The boundaries of the earth's plate are known as

- | | |
|-------------------|-------------------------|
| a) (iii) and (iv) | b) (i) and (iii) |
| c) (i) and (ii) | d) (ii), (iii) and (iv) |

74. Which of the following cannot be charged easily by friction? [1]

- | | |
|--------------------|------------------------|
| a) A woollen cloth | b) A plastic scale |
| c) A copper rod | d) An inflated balloon |

75. The power of which one of the following is expressed in terms of magnitude on a scale called the Richter Scale? [1]

- | | |
|---------------|--------------|
| a) Tsunami | b) Cyclone |
| c) Earthquake | d) Lightning |
