

SOUND -03

Class 08 - Science

1. The frequency of ultrasound is: [1]
a) Above 20000 vibration/sec b) Under 20000 vibration/sec
c) Under 20 vibration/sec d) Under 200 vibration/sec
2. What is the name of the strings which vibrate in our voice box when we talk is [1]
a) pinna b) string
c) air column d) vocal cord
3. If sound of lightening is heard after 12 seconds of lightening, then distance of observation of sound from the place where lightening occurs, is [1]
[Given, speed of sound = 330 m/s]
a) 2970 m b) 3960 m
c) 1485 m d) 1980 m
4. An object is vibrating at 50 hertz. What is its time period? [1]
a) 0.02 s b) 20.0 s
c) 0.2 s d) 2 s
5. The to and fro motion of an object is known as [1]
a) Vibration b) Pendulum
c) Frequency d) Wavelength
6. The part of ear which vibrates when outside sound falls on it is [1]
a) Tympanic membrane b) Eustachian tube
c) Pinna d) External ear
7. Which of the following factors influence the speed of sound most? [1]
a) Source of sound b) Nature of medium
c) Temperature d) Humidity
8. The energy circulating in telephone lines is- [1]
a) Sound Energy b) Mechanical Energy
c) Electrical Energy d) Chemical Energy
9. Time taken to complete one vibration is called [1]

- a) Pulse
b) Time length
c) Vibration
d) Time period
10. In a classroom, all the students speak together the sound produced will be called [1]
a) Noise
b) Soothing sound
c) Music
d) Pleasing sound
11. Which nerve transmits sound impulse to brain from ear? [1]
a) Optic nerve
b) Cardiac nerve
c) Auditory nerve
d) Eye nerve
12. A person standing on railway platform listens to the whistles of arriving and departing trains. The whistle heard is [1]
a) of higher pitch when train departs
b) of higher pitch when train arrives
c) the same in both cases in all respects
d) of higher intensity when train arrives
13. Which type of sound produced by a bat? [1]
a) ultrasonic
b) audible
c) infrasonic
d) subsonic
14. The police use high frequency whistles which can be heard by [1]
a) Horse
b) Human
c) Bat
d) Dogs
15. 1 hertz is equal to [1]
a) 1 vibration per minute
b) 600 vibrations per minute
c) 60 vibrations per minute
d) 10 vibrations per minute
16. The normal range of vocal cords in women is [1]
a) 40 mm
b) 15 mm
c) 20 mm
d) 10mm
17. The sound which is unpleasant to ear is called [1]
a) Noise
b) Music
c) Tone
d) Note
18. The repetition of sound caused by the reflection of sound waves is called [1]
a) Reflection of sound
b) Propagation
c) Echo
d) Reverberation
19. Sound cannot be heard directly on the moon because [1]
a) Hydrogen gas is present on moon
b) Moon has uneven surface
c) Moon is a non-luminous body
d) There is no air on the moon
20. SONAR is a device to measure distance, direction and speed of underwater objects. It is based on [1]
a) infrasonic waves
b) light waves

- | | | | |
|-----|--|---------------------------------|------------|
| | c) ultrasonic waves | d) radio waves | |
| 21. | The location of submerged objects can be detected by | | [1] |
| | a) Quasar | b) Pulsar | |
| | c) SONAR | d) Radar | |
| 22. | Sound can travel through | | [1] |
| | a) Solid only | b) Solids, liquids and gases | |
| | c) Liquid only | d) Gases only | |
| 23. | Different types similar sounds can be differentiated due to | | [1] |
| | a) Difference in amplitude only | b) Difference in quality | |
| | c) Difference in amplitude and frequency | d) Difference in frequency only | |
| 24. | Name the medium in which sound travels slower? | | [1] |
| | a) Gas | b) None of these | |
| | c) Solid | d) Liquid | |
| 25. | Speed of sound increase with | | [1] |
| | a) Increase in temperature | b) Decrease in humidity | |
| | c) Decrease in temperature | d) All of these | |
| 26. | Loud sound can be produced by | | [1] |
| | a) Smaller amplitude | b) Low pitch | |
| | c) High pitch | d) Larger amplitude | |
| 27. | The depth of oceans can be measured by | | [1] |
| | a) Both RADAR and SONAR | b) RADAR | |
| | c) SONAR | d) audible | |
| 28. | The function of three bones present in the middle of ear is to | | [1] |
| | a) Increase wavelength | b) Amplify sound | |
| | c) Increase frequency | d) Decrease pitch | |
| 29. | The time period of a vibration 500Hz is equal to | | [1] |
| | a) 0.002 seconds | b) 0.5 seconds | |
| | c) 0.2 seconds | d) 0.02 seconds | |
| 30. | The sound which is pleasant to hear is called | | [1] |
| | a) Audible sound | b) Noise | |
| | c) Musical sound | d) Inaudible sound | |
| 31. | Voice of which of the following is likely to have minimum frequency? | | [1] |
| | a) Baby boy | b) Baby girl | |
| | c) A man | d) A woman | |
| 32. | Loudness of sound is proportional to | | [1] |

- a) Square of frequency
b) Square of the amplitude
c) Amplitude
d) Frequency

33. Motion of which of these object is known as periodic motion? **[1]**
a) Aeroplane
b) Train
c) Flying bird
d) Pendulum

34. Time-period of a wave is 0.01 seconds than its frequency is **[1]**
a) 10000 Hz
b) 10 Hz
c) 100 Hz
d) 1000 Hz

35. Voice of male is heavy compared to woman because **[1]**
a) Male vocal cord is small
b) Male vocal cord is larger
c) Female vocal cord is large
d) Female vocal cord is small

36. Sound cannot travel through **[1]**
a) Air
b) Water
c) Solids
d) Vacuum

37. A pendulum oscillates 40 times in 4 seconds. The time period of vibration will be **[1]**
a) 4s
b) 0.4 s
c) 1s
d) 0.1s

38. A person is exposed to a loud sound continuously he may get **[1]**
a) High blood pressure and goiter
b) Temporary or permanent impairment of hearing
c) Skin disease and heart disease
d) Optical problems and swelling of pinna

39. An object oscillates 20 times in 1 second. The frequency of the wave produced will be **[1]**
a) 0.2 Hz
b) 20 Hz
c) 15Hz
d) 10 Hz

40. The range of human audibility lies between **[1]**
a) 30 to 30,000 Hz
b) 20 to 20,000 Hz
c) 40 to 40,000 Hz
d) 10 to 10,000 Hz

41. Ultrasound cleaner use ultrasonic waves of frequency about _____. **[1]**
a) 5 KHZ
b) 100 KHZ
c) 80 KHZ
d) 40 KHZ

42. The ceilings of a concert hall are generally curved because **[1]**
a) it better aeration in the hall.
b) as any sound from outside cannot pass through a curved ceiling.
c) they can absorb noise.
d) they reflect the sound to the audience.

43. Bat can know about their prey at a long distance even in the night by emitting **[1]**

- 5 / 8

- c) Loudspeakers d) Sitar
54. We must never put a sharp, pointed things into our ear because it can [1]
 a) Break auditory nerve b) Damage eardrum
 c) Damage cochlea d) Reduce the thickness of eardrum
55. The unit of noise pollution (level) is measured in [1]
 a) both decimal and ppm b) decibel
 c) ppm d) decimal
56. Noise pollution may cause [1]
 a) Mental disorder b) Hearing impairment
 c) Intestinal disease d) Skin disease
57. Which of the following health problem is not caused due to noise pollution? [1]
 a) Diabetes b) Lack of sleep
 c) Anxiety d) Hypertension
58. Which one of the following statement is not correct about sound waves? [1]
 a) Sound waves having higher amplitudes are louder b) Sound waves with high audible frequencies are sharp
 c) Sound waves in gases are longitudinal in nature d) Sound waves having frequency below 20 Hz are known as ultrasonic wave
59. Loudness of sound depends upon its [1]
 a) its amplitude. b) its time period.
 c) its speed. d) its frequency.
60. Sound is produced by [1]
 a) Vibration b) Cooling
 c) Moving d) Heating
61. The to and fro or back and forth motion of an object about its mean position, which produces sound is called [1]
 a) amplitude b) frequency
 c) vibration d) pitch
62. Which of the following is not a bone present in human ear? [1]
 a) Stirrup b) Hammer
 c) Anvil d) Femur
63. Plantation on the road side can [1]
 a) Reduce air pollution b) Increase noise pollution
 c) Reduce noise pollution d) Increase air pollution
64. Sound waves are similar to the waves [1]
 a) generated by the mobile phone towers b) generated in a stretched wire by hitting or

plucking the wire

- c) generated in a pipe filled with air by moving the piston attached to the pipe up and down d) of laser light passing through air
65. The speed of sound is maximum in- [1]
a) Steel b) Water
c) Vacuum d) Air
66. To increase loudness of sound _____ of vibration of sound. [1]
a) decrease its amplitude b) decrease its frequency
c) increase its frequency d) increase its amplitude
67. A sound wave has frequency of 2 kHz and wavelength of 35 cm. If an observer is 1.4 km away from the source. [1]
At what time interval could the observer hear the sound?
a) 4s b) 0.5s
c) 20s d) 2s
68. Loudness of sound can be increased by [1]
a) increasing amplitude b) decreasing frequency
c) increasing frequency d) decreasing amplitude
69. Which of the following characteristics of sound depends on amplitude of vibration? [1]
a) Speed b) Pitch
c) Loudness d) Quality
70. Which of the following sounds cannot be heard by human beings? [1]
a) Frequency of 10 kHz b) Frequency of 10 Hz
c) Frequency of 1000 Hz d) Frequency of 100 Hz
71. The relation between the speed of sound, frequency, and wavelength is [1]
a) Frequency = speed $\times$ speed b) Wavelength = frequency $\times$ speed
c) All of these d) Speed = frequency $\times$ wavelength
72. Pitch of sound is determined by its [1]
a) Loudness b) Frequency
c) Speed d) Amplitude
73. In most of the cases vibration of objects are not visible because [1]
a) Frequency is very less b) Wavelength is very large
c) Amplitude is very small d) Wavelength is very small
74. Industrial noise can be reduced by [1]
a) Not using machine that produce noise b) Removing all persons away from factories
c) Installing industrial activity away from residential area d) Shutting down all industrial activity

75. Sound travels faster in solid medium as compared to liquid and gases because

[1]

- a) Particles moves easily
- b) Intermolecular force is weak
- c) Particles are away from each other
- d) Particles of solid are very close
